DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bernard, II et al. (US 5,472,309; hereinafter "Bernard, II").

Bernard, II teaches a method comprising:

inputting information into a handheld device (scanner 126) from indicia (bar coded labels) on an open shelving system (col. 13, lines 43-57);

inputting a quantity to the handheld device corresponding to the input information ("Thus, when an operator receives a package, a handheld bar code scanner 126 could be used to automatically identify the goods... the scanner recorded both the proper identity and quantity of the received goods" (col. 3, lines 46-50; col. 15, lines 5-23));

transferring the information and quantity from the handheld device (transferring the information from the handheld device to the terminal having a monitor 455 which displays the information read (col. 13, lines 50-52)); and

queuing the information and quantity in a restocking device (col. 13, lines 43-67; col. 14, line 45 through col. 15, line 64).
